

2021 Consumer Confidence Report

Water System Name: OAK TRAIL ESTATES MUTUAL Report Date: April 2022

We test the drinking water quality for many constituents as required by state and federal regulations. This report shows the results of our monitoring for the period of January 1 - December 31, 2021 and may include earlier monitoring data.

Este informe contiene información muy importante sobre su agua potable. Tradúzcalo ó hable con alguien que lo entienda bien.

Type of water source(s) in use: Our water source is four wells.

Name & general location of source(s): These wells draw from the Santa Ynez Upland Basin. Well #2 was constructed in 1976 to a depth of 680' of 8" steel and it produces 60 gpm. Well #5 was constructed in 2002 to a depth of 930' of 10" steel casing and produces 185 gpm. Well #6 was constructed in 2008 to 880' of 10" plastic and produces approximately 220 gpm. Well #7 was constructed in 2017 to 1050' of 12" pvc casing and produces 385 gpm. Water storage consists of seven 30,000 gallon underground brick cisterns totaling 210,000 gallons of storage. Telemetry consists of a radio system between wells 2, 5, and 6 and the cisterns. An alarm system for high and low cistern water levels with computer access is installed. Main wells have automatic chlorinator systems.

Drinking Water Source Assessment information: The source water assessment was completed by Environmental Health Services and is available upon request to the water company.

Time and place of regularly scheduled board meetings for public participation: Approximately every two months
